Experience

fiveinnolabs

3 years

Chief AI Officer

December 2022 - Present (3 years)

Ireland

Lead the strategic design and execution of generative AI training programs and consulting services with a focus on turning emerging AI capabilities into practical, high-impact solutions for businesses.

Key Responsibilities:

AI Strategy and Roadmapping

Define and maintain the company's AI direction, including use-case selection, tool stack evolution, and capability priorities, based on client needs, technical feasibility, and market shifts.

Solution Development

Design and package scalable GenAI offerings such as the HELIOS executive masterclass, automation blueprints, and integration frameworks. Build systems that deliver value fast and are simple to deploy.

Productisation of Expertise

Translate internal IP, workshops, and client learnings into repeatable assets: toolkits, playbooks, training tracks, and templates that enable scale and consistency.

Technical Foresight and R&D

Track developments in GenAI and related fields. Evaluate and test tools hands-on to assess business relevance, risks, and implementation readiness. Feed insights directly into solution design.

AI Educator

December 2022 - Present (3 years)

Ireland

As Chief AI Educator at fiveinnolabs, my primary focus is to help demystify and disseminate knowledge about AI and its transformative potential across industries. Responsibilities include:

Develop and Lead Educational Initiatives: craft comprehensive educational programs designed to enlighten individuals and organisations about AI's capabilities, ethical considerations, and practical applications.

Strategic Consultation and Thought Leadership: provide expert advice on AI strategy and innovation, helping businesses navigate the complexities of emerging technologies and integrate them into their operations effectively.

Facilitate Learning and Development: conduct workshops, seminars, and lectures, both in-person and online, to a diverse range of audiences, from industry professionals to academic institutions.

Research and Continuous Learning: stay abreast of the latest advancements in AI and related fields, ensuring that the knowledge imparted is current, relevant, and forward-thinking.

Collaborate Across Disciplines: work closely with technologists, business leaders, and academic scholars to foster a multidisciplinary understanding of AI and its broader societal impact.

Through this role, I continue my mission to enlighten, encourage, envision, empower, and equip individuals and organisations for the future of work in an AI-driven world.

National College of Ireland

Adjunct Assistant Professor, Innovation and Emerging Technologies

May 2015 - Present (10 years 7 months)

IFSC, Dublin, Ireland
